DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II in the reply filed on November 3, 2006 is acknowledged. The traversal is on the ground(s) that the Groups I, II and III are not distinct or independent of each other. This is not found persuasive because the independent claims comprise elements that are not required from each independent claim, e.g. claim 33 in juxtaposition with claims 1 and 42, and would require additional search/consideration.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-14 and 42-55 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on November 3, 2006.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 33-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carolan et al., US 7,027,432

Carolan discloses a communication unit, e.g. 160, a data communication network, e.g. 120, 130, 141, 142, 151, 152, a service credential request, e.g. 500, a service credential, e.g. 506, a user credential, e.g. 507, 508, an accounting message, e.g. 510. Carolan does not specifically disclose the phrase an accounting manager. However, Carolan does disclose account data, e.g. claims 1, 6, being transmitted through the data network. Official Notice is taken that an accounting manager has been common knowledge in the data processing art, as are the features recited from claims 34-37. To have provided such for Carolan would have been obvious to one of ordinary skill in the art.
